

Company Profile

Innovation is our Business

Overview RFIDInnovations

- founded 2005 by Volker Knapp and Michael Mally
- 12 years of experience with RFID hardware and RFID systems
- 18 years of experience in software development
- customers in the European Union and many others worldwide

- **Main objectives**
 - innovative RFID-products adaptable to any possible customer wishes
 - optimization of in-house processes using RFID technology

- **Product range**
 - Consulting, development and system design
 - System integration including evaluation, project management, etc.
 - Sale and development of various RFID hardware (LF, HF and UHF)
 - RFID software products based upon our RFID Framework SmartID™

About RFID

- **Radio Frequency IDentification:** automatic identification by means of radio waves
- contactless data transmission via magnetic respectively electro-magnetic fields without optical connection
- Transponder (Tag) and Reader; active and passive systems
- different ranges and frequencies available
- long-lasting and maintenance-free systems

- appliance
 - logistics
 - animal identification
 - services
 - automation and production
 - museums and tourism
 - healthcare
 - security and safety
 - traffic
 - R&D and knowledge sector
 - retail
 - hotel and catering sector etc.

Products of RFIDInnovations

- **SmartAccess:** access control and time recording for small to large companies including barrier system for parking area management, cashless payment,...
- **SmartInventory:** optimized inventory process through RFID, e.g. LKH Graz (hospital) or Bosch & Siemens Haushaltsgeräte (household appliances)
- **SmartSales:** product information respectively presentation system for customers and employees directly at the point of sale including available stock live from ERP system
- **SmartGuard:** online tracking of patrolling guards using RFID checkpoints
- **SmartFM:** facility management including RFID inventory management
- **SmartService:** logging of maintenance and servicing direct to the machine part
- **SmartDatagate:** automated synchronizing of data records between different ERP systems
- **SmartRental:** managing lending and returning of RFID tagged inventory items
- **SmartPatient:** patient identification and data tracking for hospitals
- **SmartKanban:** system for optimizing processes in manufacturing using RFID aided kanban
